Dr. Nita Scherer (Francophone stream)

Continuing Professional Development Chair

Dr. Safeena Kherani

Research Director

Dr. David Schramm

Chair's Report

It is my pleasure to present the Annual Report for the Department of Otolaryngology – Head and Neck Surgery at the University of Ottawa for 2012-2013.

Our members continue to deliver excellent clinical care to our patients. Highlights this year include the development of a Trans-Oral Robotic Surgery (TORS) program in Ottawa, only the second in the country. In addition, Dr. David Schramm has been appointed as Surgeon Champion, for the Ottawa Hospital National Surgical Quality Improvement Program (NSQIP), building on his expertise in Epidemiology and his research interest in surgical outcomes, as well as our Department's commitment to the advancement of surgical quality. We are very proud that Dr. Schramm has been promoted to this important role.

This was also an important year for our Post-Graduate Residency Program in Otolaryngology – Head and Neck Surgery, as we were granted Full Approval by the Royal College of Surgeons of Canada for the next five years. The credit goes to our Post-Graduate Director, Dr. J. P. Vaccani, who has guided the program through many important changes over the past three years, and to the hard work and dedication to teaching of all our Department members. In addition, our Department was well represented on the Royal College of Surgeons of Canada Examination Board in Otolaryngology – Head and Neck Surgery. I served as Chief Examiner, English Board, and was joined at the examination by Dr. Mike Odell, Dr. Andre Lamothe, Dr. Laurie McLean, Dr. Johnna Maccormick, and Dr. J. P. Vaccani. This work serves our specialty and our patients, and our Department members who gave their time and energy for this are to be commended. Our graduating residents this year, Dr. Melanie Duval and Dr. Darren Tse, were both successful at the Royal College Exam. Dr. Duval will be doing a Pediatric Otolaryngology Fellowship in Salt Lake City, Utah, while Dr. Tse will be starting a practice in Winchester, Ontario. We are very excited for both of them. In addition, our Head and Neck Oncology Fellow, Dr. Benoit Guay, accepted an appointment as an Academic Head and Neck Surgeon at Laval University in Quebec City, and is doing extremely well there. He was a great asset to the Department and will be missed.

Our Department has continued its commitment to research. Dr. Kristian Macdonald has successfully completed the course work to reach the thesis component of a Masters in Epidemiology at the University of Ottawa this summer, for which he is to be congratulated and can now assume full-time clinical activities. Our Department was responsible for 31 peer-reviewed papers and over \$920 000.00 in grants over the last year, which is a significant accomplishment for a small Department such as ours.

No Department could be successful without renewal by new staff. Dr. Stephanie Johnson-Obaseki has completed a Fellowship in Head and Neck Oncologic Surgery at the University of Toronto, and will be starting a Masters in Public Health at Harvard University in July. She has joined our Department and we are looking forward to great things in the future. In addition, two of our ex-residents, Dr. James Bonaparte and Dr. Darren Tse, will be joining our University Department and getting involved in teaching both undergraduates and residents in Otolaryngology – Head and Neck Surgery; they will be significant assets to our program.

Lastly, our Department underwent a five-year review by Dr. Stuart Archibald from McMaster University this spring. A number of important recommendations from that review will be implemented going forward. I am pleased to report that I have accepted a second five year term as Department Chair/Head, and look forward to working with this talented group as we continue to improve in the years to come.

Martin Corsten, MD FRCSC

Chair/Head

Department of Otolaryngology - Head and Neck Surgery
